

Improve School Safety with Blue Fusion

A Solution Preventing Violence and
Enhancing Safety.

OVERVIEW

Blue Fusion is a patented technology that optimizes a school's investment in technologies by integrating them into a single, client-focused school security platform led by the most innovative analytical tool available used by Law Enforcement and the Department of Defense.

Compliant with the Federal Educational Rights and Privacy Act (FERPA) as well as the Health Care Insurance Portability and Accountability Act (HIPAA).

Making Technologies Work Together to Improve Security

Educational institutions have invested significantly in technologies to enhance campus security however, these systems often operate in isolation, hindering effective data integration. Blue Fusion addresses this challenge with its data-agnostic platform, seamlessly integrating various security technologies and data sources.

Our platform connects to a wide array of security technologies and data sources pertinent to educational security, such as:

- Publicly Available Data
- License Plate Readers
- Weapons Identification Systems
- Anonymous Reporting and Alerting Tools
- Facial Recognition (non-collecting)
- State and Regional Databases
- Social Media and Dark Web Monitoring

Security Analytics and Alerts for the SRO

Blue Fusion streamlines your school's security systems, offering real-time data access and automated alerts for comprehensive situational awareness.

Retain Control of Your School Security Solution

Blue Fusion empowers schools to maintain control over their security by integrating chosen technologies and datasets into a unified system. Unlike incompatible solutions or restrictive contracts, our platform allows seamless addition of new technologies or data sources through custom connectors, ensuring adaptability and long-term value.

Facilitate Security with One Contract Provider

Blue Fusion simplifies contract management with a “one-stop” approach to school security. The company has relationships with many technology vendors & can arrange to evaluate them for the most optimal school security solution and placing the required data, services and technologies into one easy to manage contract.

Data & Technology Fusion to Improve School Safety

An Affordable, Customized School Security Solution.

Our patented capability of ingesting multiple disparate data sources with one single query provides SRO's with the data necessary to identify potential violent outcomes and compress the notification period for school authorities to intervene.

911 INFORM

Ingest Any Form of Data for Analytics and Alerts

Emergency, Open Source and Educational Data

State, local and regional educational databases, weather and natural disaster alerts, transportation, local law enforcement alerts.

Technologies and Sensors

Data from Texting Apps, Cameras, Locking Doors, Sensors, License Plate Readers, Social Media/Publicly Available Information Databases, State and Regional Education Databases can be ingested to improve school security analytics.

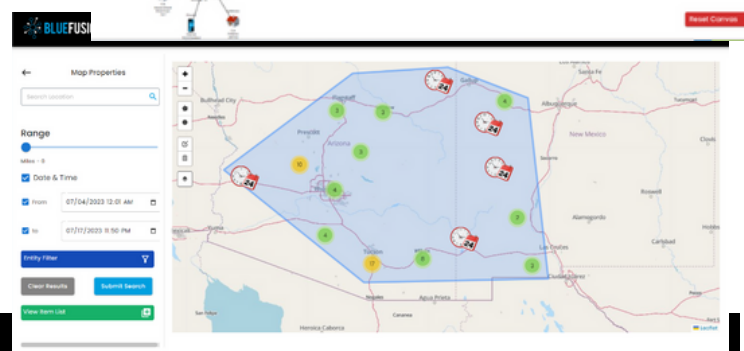

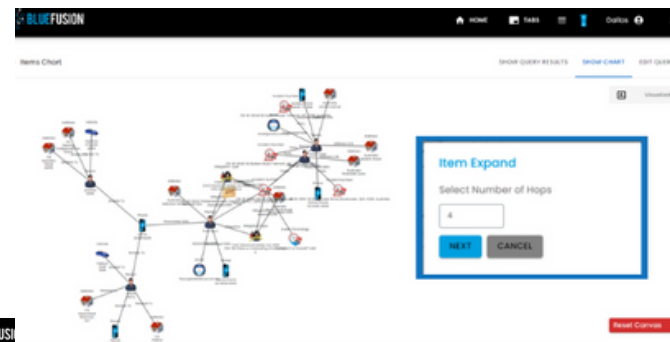

Investigations and Reporting

Blue Fusion's easy to use UI allows SRO's to create searches to conduct security investigations, monitor social media and report to local Law Enforcement.

Blue Fusion seamlessly integrates with any company, offering a unified solution through a single point of contact. This one-stop technology combines all these products into a cohesive system.

Emergency and Incident Management

Blue Fusion integrates industry leading platforms like 911 Inform and StopIT to analyze incidents, identify threat levels and provide emergency notification and response.
